DETAILED ACTION

Priority

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Information Disclosure Statement

2. The information disclosure statement (IDS) submitted on 11 June 2002 has been considered by the examiner.

Allowable Subject Matter

3. Claims 1-12 are allowed. Feichtinger US '427 teaches applicant's invention including an angle measuring system comprising a stator 10 and a rotor 5/5' for measuring an angular position between a stationary first object (drive stator 3) and a rotating second object (rotary shaft 5/5'); a coupling 2 that couples the stator 10 to the stationary first object 3 along mounting shoulder 17 so that the stator 10 is fixed against relative twisting but is also radially and/or axially resilient (c.3, lines 62-67; c.4, lines 1-8); a mounting element (leaf spring arms 8a/9a/8b/9b) attached to the coupling 2 wherein the mounting element clamps a face of the stationary first object by expanding radially (c.4, lines 28-34); an expansion element (cone portion of conical screw 18a.1) that interacts with the mounting elements 8a/9a/8b/9b so as to cause the radial expansion; and a conical screw 18a.1 that actuates the expansion elements 8a/9a/8b/9b. The only difference is that in Feichtinger, the conical screw 18a.1/27 is not "screwed into the stationary first object." In Feichtinger, screw 18a.1/27 is disposed parallel

to the axis of rotation D (Fig.5) and hence do not "screw into" the stationary stator 3.

Feichtinger states that this makes the screw "axially accessible by means of a tool even in the mounted state" (c.7, lines 47-49). There is no teaching or suggestion to mount the screw transverse to the axis of rotation D such that it "screws into" the stationary stator. This would hinder "axial accessibility" desired by Feichtinger since the screw head would not be readily accessible by a tool from a direction parallel to the axis of rotation D.

4. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
